

CHEERLA SHAMITH

Full-Stack Developer • Generative AI Engineer • AI/ML • MERN Stack

+91 63052 84229 | chshamith888@gmail.com

I am a dedicated Full-Stack Developer and Generative AI Engineer with a strong foundation in AI/ML, especially within the MERN stack. Currently pursuing a B.Tech in Computer Science & Engineering. I have hands-on experience through impactful internships and projects, demonstrating a consistent capacity for innovation, achieving notable recognition and developing AI solutions aimed at societal benefits.

EXPERIENCE

ML Research Intern

01/2026–04/2026 Kuala Lumpur

UCSI University, Kuala Lumpur, Malaysia

ML Research Intern (Remote)

- Evaluated 10 ML algorithms (AdaBoost, XGBoost, RF, SVM, GBM, KNN, LR, Naive Bayes, Decision Tree, MLP) and 2 DL models for diabetes classification across 5 medical datasets
- AdaBoost achieved 99.47% accuracy; results compiled into team comparative analysis report

Computer Vision Research Intern

05/2026–07/2026 Andhra Pradesh

NIT Andhra Pradesh

Computer Vision Research Intern

- Built AI-based automated answer script digitization and drone video analytics system under faculty supervision
- Automated handwritten script evaluation with real-time inference speed using drone footage and AI agent frameworks

Research Intern

05/2026–07/2026 Tiruchirappalli

NIT Tiruchirappalli, Dept. of Computer Applications

Research Intern

- Applied ML research on structured data classification covering mathematical foundations for AI/ML under faculty guidance
- Conducted benchmarking of supervised learning models for departmental publication; included resume and interview preparation track

EDUCATION

B.Tech in Computer Science & Engineering

SASI Institute of Technology & Engineering

08/2023 – 05/2027 | CGPA: 9.38/10 (Sems I–V)

CERTIFICATIONS

- Oracle — AI Foundations Associate
- Oracle — Generative AI Professional
- AWS — Introduction to Generative AI
- IBM — Machine Learning with Python
- MongoDB University — Introduction to MongoDB
- Google — Analytics Certification

KEY ACHIEVEMENTS

★ AWS × Hack2skill — AI for Bharat (Feb 2026)

Shortlisted nationwide; earned \$100 AWS credits for the Gramin Sahayak project. Built a full-stack AI civic platform reaching rural India.

🏆 MOSPI Selection

Selected under Group A by Ministry of Statistics & Programme Implementation, Govt. of India, from a large national applicant pool.

🏆 PRAYATNA 2.0 National Hackathon

Competed nationally, building a working prototype under tight deadlines with team; demonstrated rapid full-stack and AI prototyping ability.

PROJECTS

Gramin Sahayak / AI Civic Platform for Rural India

- Full-stack AI platform providing multilingual access to government schemes and health resources using React.js, Node.js, MongoDB, GenAI & AWS (EC2/S3)
- Voice & text chatbots integrated in over four regional languages; 50+ test users onboarded; shortlisted at national hackathon

SmartSupport / AI Customer Support Triage System

- AI engine that auto-classifies and routes support tickets by urgency and sentiment using Gemini API, Pinecone vector search & RAG pipeline
- Leveraged Gemini API and Pinecone for efficient ticket management; semantic KB search cuts agent lookup time significantly

MeetMinds / Offline AI Meeting Intelligence Platform

- Offline AI platform transcribing meetings via Whisper large-v3, speaker diarization via Pyannote.audio, structured minutes with LLaMA 3 via Ollama
- Zero cloud dependency with robust role-based access control; RAG semantic search over full meeting history using FastAPI & React.js

SKILLS

Python JavaScript Java HTML Tailwind React
Node.js Express.js REST JWT MongoDB SQL
Google Firebase Supabase AWS EC2 S3 Vercel
Netlify Git GitHub Docker IBM Scikit-Learn
TensorFlow PyTorch OpenCV Pandas Numpy
Matplotlib XGBoost ML Algorithms SVM KNN
Naive Bayes Decision Tree AdaBoost

COMPETITIVE PROGRAMMING

CodeChef ★★★★★

Peak Rating: 1703

2,000+ problems solved

LeetCode

115+ problems

Arrays · DP · Graphs

Codeforces

72+ problems

Div. 2 participant

Focus Areas

DSA · Greedy · Sorting
Binary Search · Recursion

LANGUAGES

English Professional
Telugu Native
Hindi Conversational

INTERESTS & EXTRAS

🤖 **AI Agents & Automation** — building agentic pipelines with LangGraph & LLM APIs

🌐 **Full-Stack Web Dev** — cinematic portfolio sites with GSAP & ScrollTrigger

📊 **Open-Source ML Research** — benchmark studies on tabular & CV datasets

💡 **SaaS & Side Projects** — job automation tools, RAG systems, AI-native products

🏆 **Hackathons** — regular participant at national-level tech & AI competitions
